Claims:

#09/822,475

I claim the rights to a new coding methodology for information communication security, called the Drybedoc process, that provides a complete and unique English equivalent alphabet by exact reproduction and classification of specific design lines from THE SYMBOL, a copyright geometric design.

Paul D. Byrd

A handwritten signature in black ink that reads "Paul D. Byrd". The signature is written in a cursive style, with the first letters of each word being capitalized and prominent.

Statement about DRYBEDOC Books.

All three DRYBEDOC Books were never sold. To my knowledge none of information in the books was usably understood and has never been used in public communication. I feel it would be unfair to classify the books as public publications.

Sincerely,

Paul D. Byrd
